SITUATION SUMMARY

Cal OES Activation Status

State Operations Center	Inland Region EOC	Coastal Region EOC	Southern Region EOC
Level 1	Level 1	Level 1	Level 1

Oroville Dam Auxiliary Spillway Incident

- Flow from the flood control spillway will be reduced from 40,000 cubic feet per second to zero.
- As flows are reduced, DWR will monitor the status of the dam, spillways, and related structures to ensure their continued safety and stability.
- Flow to the Feather River will be reduced gradually to minimize risk to downstream levees per the Army Corps of Engineers operational requirements.
- This flow reduction in the river will be buffered by the Hyatt Powerplant, Diversion Pool, Thermalito Forebay, and the Thermalito Afterbay to a final flow of 13,000 cubic feet per second.

Per the DWR Flood Operations Center and California Data Exchange Center (CDEC) [as of 04/03/17 at 0900 hours](#):

- Inflow: [15, 225](#) cfs.
- Outflow: [0](#) cfs.
- The current lake elevation is [842.12](#) feet.

Mission Tasking

- 2017-SOC-33363: Road Repair (Butte County) – On Scene.
- 2017-SOC-34379: Caltrans engineer to visually inspect and conduct Impact-Echo Testing on the gated concrete spillway floor – On Scene
- 2017-CalOES-34685: Asbestos Monitor (Butte County) – Coordinating.
- 2017-SOC-31712: 2 Structural Engineers for evaluation of the Oroville Spillway Bridge (Butte County) – On Scene.

SITUATION SUMMARY

2017 February Storms

Cal OES Coastal Region

Pfeiffer Bridge Incident, Monterey County

California Highway Patrol (CHP) and Caltrans had a hard closure on the Pfeiffer Bridge on HWY 1 at mile marker 45.52 (SB Sycamore Canyon and the Bridge) due to a crack in the bridge.

- With the bridge removed, the community of Big Sur is isolated, an estimated 450 people, in 3 different areas/enclaves.
- Backup air medical transport plans have been developed for medical emergencies through Cal OES Law Enforcement Branch.
- The southern detour route is open to local traffic only as of 03/13/17.

Cal OES Inland Region

River Forecast - The following rivers are forecast to meet or exceed Monitor Stage:

- [Sacramento County: Cosumnes River at Michigan Bar](#)
- San Joaquin County: San Joaquin River at Vernalis
- Stanislaus County: Tuolumne River at Modesto, San Joaquin River at Newman
- Merced County: Merced River at Stevinson

WEATHER OF CONCERN

Weather of Concern

- For portions of Northern California, a deepening upper level low will approach from the Pacific Northwest on Thursday. An associated cold front will move through either late Friday night or Saturday and will bring in the potential for heavy rain and gusty southwesterly winds.
- **Active Weather Warnings, Watches and Advisories by County:**
- http://www.wrh.noaa.gov/sto/brief/www_bc_cal.php - Temporarily unavailable. NWS is in the process of repairing the page

WEATHER SYNOPSIS BY REGION

NORTHERN CALIFORNIA

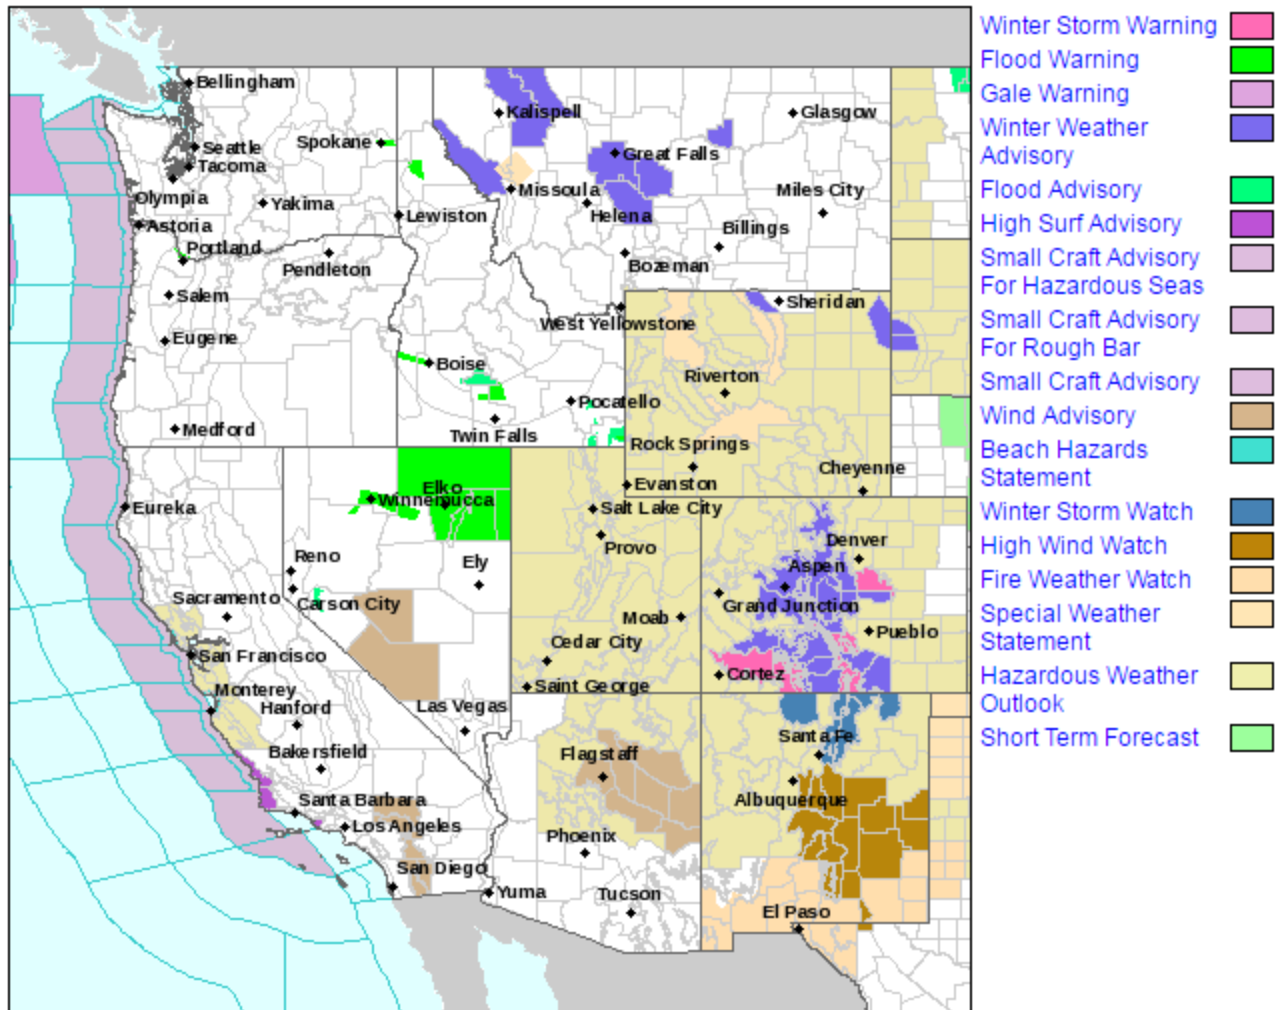

The dry northerly wind pattern that has been with us for the past several days will come to an end by early this afternoon. Mild and dry weather is expected through Wednesday afternoon as high pressure passes overhead then slowly moves off to the east. High clouds will increase over the region on Wednesday as the next Pacific storm system approaches. Light rain will move into far northwest California Wednesday night. Light to moderate precipitation will spread to the entire region on Thursday as the first wave of the storm system moves in. Snow levels will be 5000 feet or higher. More waves of precipitation will move through Thursday night through Sunday, with snow levels generally 4000 feet in the north and 5000 feet in the south. The final showers will end in eastern areas Monday. Another round of wet weather may reach the region during the middle of next week.

SOUTHERN CALIFORNIA

A trough dropping into Nevada from the Pacific Northwest will bring west to northwest winds of 20 to 30 mph with gusts to 50 mph to the mountain ridges and desert passes through this evening. Temperatures will be near normal today, with 50s to low 60s across the mountains and mid 60s to mid 70s in the valleys. Minimum humidity will be mainly between 20% and 40%. A ridge of high pressure will build into California from the southwest bringing warmer temperatures and dropping minimum humidity to 15% to 30% Tuesday and Wednesday. Maximum temperatures will warm to around 10 degrees above normal by Wednesday. Winds will be light Tuesday and Wednesday. A Pacific trough will bring a cooling trend and an increase in humidity Thursday through this weekend. This trough will also bring showers to Central California starting Friday morning and to Southern California starting Friday night. South to west winds of 20 to 30 mph with gusts to 50 mph will surface across the wind prone mountain and desert areas Thursday afternoon through this weekend.
